CIRCULAR

To: All Business Units, Consultants and Contractors.
Subject: Appraisal fee calculation for Racking systems
Date: 31st of October 2010
Our Ref: Circular-75318/2010/MAS

We would like to bring to your attention that Racking systems without mezzanine levels or walkways above floor levels are classified as Minor Modification and are therefore exempted from the Trakhees-CED approval procedure. (Trakhees-EHS approvals for all racking systems are mandatory)

Any racking systems with walkways and mezzanine levels need to be submitted to both Trakhees-CED & EHS for approvals along with structural details and calculations. The appraisal fee calculation for these cases will be based as such:

- Racking system with walkways: Area of each level (including the racking area and the walkway area at each walkway level) @ AED 5.4/m² excluding the ground floor level.
- Racking system with mezzanine levels: Area of each mezzanine level (including the racking area and the walkway area at each mezzanine) @ AED 5.4/m² excluding the ground floor level.

Please note that:

- Any other special cases will be reviewed on a case to case basis
- No layers shall be taken into consideration for the appraisal fee calculation.
